Sir:

**PRELIMINARY AMENDMENT**

Prior to examining this application on the merits, please add the following new claim 12:

12. A beverage filter cartridge comprising:

a cup-shaped outer container having a side wall and a bottom; and

a cup-shaped filter element having a side wall and a bottom; said filter

element being arranged to subdivide the interior of said container

into a first chamber inside said filter element and a second chamber

located between the bottom of said filter element and the bottom of

said container, said filter element having an upper rim joined to the

container side wall at a peripheral juncture, and said filter side wall

having exterior channels that face said container side wall and that

lead downwardly from said peripheral juncture to said second

chamber.
